DETAILED ACTION

Claims 1-38 are pending in the instant application. Claims 20-38 have been canceled by the Examiner's amendment.

Examiner's amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Pamela A. Mingo on 26 January 2006. The application has been amended as follows:

Delete claims 20-38.

In claim 8, line 23, delete "and" after figure , and insert --,--.

In claim 8, line 23, insert --; and--.

In claim 10, line 3, delete "." after heterocycle, and insert --; --.

In claim 10, line 3, delete "." after the word heterocycle, and insert --,--.

Reasons for Allowance

The present invention is directed to a compound or a pharmaceutical composition for treating hepatitis C virus infection. The closest prior art of record is WO2001/JP9790 (Kontani et al.), which discloses a compound as anti-herpes agent

with structure of

. The compounds are not related to the compounds disclosed in the instant application. Applicants' co-pending application US2005/0069522A1 filed on 8/8/2003 discloses the inventions of combination pharmaceutical agents inhibitors of HCV replication. Provisional Obvious Double Patenting over some of the claims between these two applications is found. For this reason, the Examiner suggests to delete the claims 20-26. Claims 27-38 are deleted due to not enablement under 35USC112 and not statutory under 35USC101. Therefore, claims 1-19 are allowed.
